Funding UW Mathematics Graduate School

Graduate education is expensive, but most math grad students at UW are fully supported throughout their graduate careers by a combination of teaching assistantships, research assistantships, and fellowships. The following links provide information on costs and resources for funding.

- Tuition and Fees
- Teaching Assistantships
- Research Assistantships and Fellowships
- Guidelines for TA and RA Appointments

Housing

Seattle is not a cheap place to live. One housing option is the [on-campus housing](https://www.math.washington.edu) available for both single students and families. However, it fills up rapidly, so be sure to get your reservation in as early as possible; even then, you might be put on the waiting list and have to wait until after the start of Autumn quarter before you can move in.

A variety of off-campus rental housing is available: rooms in boarding houses or shared apartments can usually be found. To locate rental housing, you can try the classified advertisements in the [Seattle Times](https://www.seattletimes.com), [UW Daily](https://www.uwdaily.com), or [craigslist](https://www.craigslist.org), for example.

New international students should get in contact with the Foundation for International Understanding Through Students ([FIUTS](https://www.fiu.org)), which offers a wide range of services including homestays with volunteer hosts when you first arrive in Seattle, assistance with finding permanent housing, and a special orientation program for international students.
